

Grandeur

Grandeur's beauty is complemented by unmatched functionality. Easy and quick installation makes restoration or new construction efficient and exact. Smooth, yet sturdy

mechanics, achieved through demanding production tolerances, ensure silk-like operation that is backed by our industry leading lifetime warranty.

Grandeur's extensive range of styles, finishes, plates and knobs are all designed to be mixed and matched to fit your personal taste.

Unleash your imagination and enrich your life with Grandeur!

Distinctiveness Is Our Goal

Our products are traditional styles with long-standing appeal, but with unequalled attention to the design details. Compare them with any other door hardware and see the difference for yourself.

Broad Finish Options

We believe that finish and style go hand-in-hand, so we offer up to seven finishes in every style. Lifetime brass (PVD), a polished brass option, is available in each style (not shown below). Find that one finish that will complete your decorating look!

Antique Pewter

Bright Chrome

Polished Brass

Satin Nickel

Timeless Bronze

Vintage Brass

Simplicity Where It Matters

By keeping the end-user in mind, we have kept things simple whenever we can. Our latch is designed to be easily oriented to a door, even after it is installed. Longplates with levers do not require handing. Deadbolts use the standard C-keyway. We take care of the details, so you don't have to!

Easy Installation

Installation can make or break a great lock. Our solution: make installation easy. As an example, we incorporated our patent-pending mounting system for long plate design, and a floating spindle for minor trim alignment errors. We have also eliminated problem parts such as exposed spindle springs that can jam, and set screws which can harm the finish durability of decorative trim and which often work themselves loose.

Quality From The Start

Most companies use hollow brass knobs, zinc levers finished to look like brass, and glass instead of crystal. At Grandeur, we use solid brass knobs, the highest quality forging brass in both knobs and levers, and 24% lead-crystal knobs. Using the highest quality materials enables us to produce the finest quality finished products.

Quality By Design

Quality is intimately linked to the manufacturing process. Each step in our process has been designed and refined to provide the best possible quality. We forge from solid brass to minimize defects. We hand-polish and hand-finish every piece to insure that a piece made today will match those we make years from now.

Quality For Life

At Grandeur, we build our products to provide hundreds of thousands of worry-free cycles. So while our locks are beautiful to look at, they also include features like spring-assisted knobs and levers, to make them robust. Are these features necessary? We think so, and are happy to back them up with the industry's best warranties so that you can be assured of a lifetime of trouble-free use!

Elegant Exterior Styles

We have extended each of our six style families to include distinctive, matching handleset and deadbolt exterior designs. Our exteriors have been designed with a high level of security in mind so that you can enjoy the peace of mind that comes with knowing your home is secure, while also enjoying the stunning appearance of these unique styles!
