Mortise Spindle Standard Spindle Privacy Spindle Dummy Spindle

Mortise Locks

Replace your rusty old locks with our high-quality mortise lock. You'll be thrilled with the quality of these exquisite reproductions.

Details:

- All mortise locks are keyed alike.
- Latch kit included: Strike, Faceplate and mounting screws
- 2 Steel "Skeleton" keys

Tubular Latches

Our interior tube latches are made to fit modern, 2-1/8" pre-drilled doors.

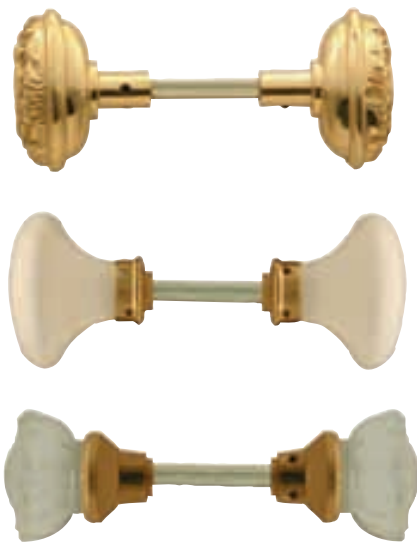

Details:

- Passage, Privacy and Deadbolt tubular latches are available in two backsets, 2-3/8" and 2-3/4"
- Standard backset is 2-3/8"; please specify 2-3/4" if desired

Latch Kits

Details:

- Solid brass
- Passage and Privacy Faceplate – 1" wide X 2-1/4" length
- Passage and Privacy Strikeplate – 1-3/4" wide X 2-1/4" length
- Deadbolt Faceplate – 1" wide X 2-1/4" length
- Deadbolt Strikeplate – 1-1/8" wide X 2-3/4" length
- Latch kit plates are approximately 1/16" thick
- Extended Lip Strike available by special order

Doorknobs

Our high quality, forged brass doorknobs are not to be confused with cast imitations. All of our doorknobs are mounted on solid, forged brass bases, not brass plated. If you're restoring a historic building, our doorknobs may fit right into your existing backplates.

Features:

- 2 steel, Allen-head set screws
- Base Diameter – Approximately 16 mm
- All doorknobs are sold in pairs and include a Standard Spindle
- Ferrule – Approximately 15 mm (Crystal, Waldorf & White Porcelain only)

Rosette Backplates

Many old doorknob styles can be matched up with our two rosette backplates. Choose from our two Rosette styles either the Classic or Rope. Please indicate function when you order. See the following listing to determine function.

Details:

- Base of doorknob must be able to fit in or sit over a 17 mm hub opening
- Passage and Privacy Rosette pairs are made to fit a 2-1/8" standard bore hole.

Functions:

Passage Rosettes – Passage rosettes install back-to-back with machine screws. Cannot be used individually. Sold as a pair.

Privacy Rosettes – Privacy rosettes install back-to-back with machine screws. The inside plate will have a third hole for the Privacy Pin installation and the outside plate will have one hole for the emergency egress. Sold as a pair.

Dummy Rosettes – Dummy rosettes are meant to be used over a Dummy Spindle. The doorknob must be installed to keep the rosette in place. They do not have any screw holes in them. They can be mounted individually or on both sides of the door. Sold as each.

Mortise Rosettes – Mortise rosettes are installed directly to the door with wood screws. They can be mounted individually or on both sides of the door. They are meant to be used with our mortise lock, but can be used for other purposes. Sold as each.

Long Backplates

Many old doorknob styles can be matched up with our solid forged brass backplates. Some are available with or without keyholes, while others are only available with a keyhole.

Details:

- Base of doorknob must be able to fit in or sit over a 17 mm hub opening
- Center of hub to center of keyhole is 2-1/4"

Keyhole Escutcheons

These keyhole escutcheons are supplied with our Classic or Rope rosettes when ordered with our mortise locks. Choose either the Classic or Rope style.

Classic Keyhole
Escutcheon
2" X 1-3/16"

Rope Keyhole
Escutcheon
1-7/8" X 1-1/8"
